

FROM PRIVATE JET EXPERTISE TO COMMERCIAL CABIN INNOVATION SOGECCLAIR REDEFINES THE PASSENGER EXPERIENCE

Blagnac, France, April 9, 2026 - On the occasion of Aircraft Interiors Expo (AIX) 2026, SOGECCLAIR is taking a new step forward, demonstrating its ability to turn expertise forged in business aviation into tangible innovations for commercial aviation. The Group will showcase its latest cabin interiors solutions and confirm its position as a leading player in the development of leading cabin solutions.

A specialist in integrated systems and cabin mechanisms, the Group draws on decades of experience designing business aviation solutions to address airlines' current challenges: product differentiation, cabin volume optimization, and enhancing the passenger experience.

With VISTA, the company takes this approach one step further, translating its know-how directly into the commercial aviation market.

VISTA: A HOLISTIC APPROACH TO CABIN INNOVATION

With VISTA, SOGECCLAIR presents a demonstrator of its premium cabin vision, embodied in a business-class environment to showcase the key features and touchpoints of the passenger experience.

This integrated approach combines cabin architecture with systems integration.

Inspired by business aviation standards, this demonstrator highlights the convergence of precision engineering, user-centered design, and aeronautical operational constraints, with the ambition of transferring business aviation excellence to commercial aircraft. VISTA focuses on optimizing key cabin functions, privacy, comfort, stowage, and modularity, through seamless and refined integration of technology.

"With VISTA, we are applying our expertise from business aviation to the key touchpoints of the passenger experience. The goal is to improve comfort, usability, and the perceived value of the cabin," said Philippe Brel, CEO of SOGECCLAIR.

INNOVATIONS FOCUSED ON THE PASSENGER EXPERIENCE

The VISTA demonstrator embodies a new generation of front-row cabins, designed as a true personal space where every detail is optimized to deliver privacy, comfort, and efficiency, with particular attention to integration, modularity, and system ergonomics.

At AIX 2026, SOGECCLAIR will unveil several major innovations:

Privacy Door: redefining onboard privacy

Essential feature in business class, privacy and acoustic comfort are taken to the next level with a dual-motion door system (vertical and horizontal), delivering smooth, elegant kinematics.

This new generation of door provides an intuitive user experience for both passengers and crew, while meeting integration, weight, and certification constraints.

Meal Tables: optimized surfaces tailored to every use case

Two complementary architectures address different use cases:

- A bi-fold table integrated into the main passenger seat console,
- A bi-fold table integrated into the sideledge, suited to mini-suite configurations, designed to provide a shared, versatile surface while facilitating onboard use and movement.

These solutions align with a cabin volume optimization strategy, offering up to 1,000 square inches of surface area, while ensuring robustness, reliability, and ease of operation for crews.

Front Row Monument Minisuite: a cabin designed as a personal space

This solution is based on transforming the front-row monument into an open, premium mini-suite, offering a more generous and flexible space clearly oriented toward passenger comfort, optimizing available volumes while integrating advanced stowage solutions.

This approach helps create a smoother, more functional passenger environment with strong perceived value, drawing on business aviation principles tailored to the requirements of commercial transport.

AN INTEGRATED VALUE CHAIN

SOGECLAIR relies on a comprehensive value chain covering:

- Cabin design and architecture,
- Engineering and systems integration,
- Qualification and certification,
- Industrialization and production.

This approach enables the Group to support end-to-end complex programs, ensuring technical consistency, regulatory compliance, and operational performance.

Through its expertise, SOGECLAIR supports aircraft manufacturers and airlines in developing innovative solutions for commercial aviation, business aviation, and the VIP market. Its solutions already equip many aircraft operated by major players worldwide.

Meet us at Aircraft Interiors Expo (AIX) in Hamburg, April 14–16, 2026,

Hall B6 – Stand 6D70L, to discover the VISTA demonstrator and SOGECLAIR innovations in detail, as well as its solutions and mechanisms dedicated to the VIP market.

An opportunity to discover how these technologies are helping shape the cabins of tomorrow.

ABOUT SOGECLAIR

A supplier of high value-added innovative solutions for more sustainable and safer mobility, SOGECLAIR brings its high-quality engineering and manufacturing capabilities to advanced industries: aeronautics, aerospace, automotive, rail, and defense. Supporting its customers and partners from design and simulation through to end of product life, across the entire manufacturing chain and entry into service, the Group's employees are located worldwide to provide high-quality, local support to all its customers.

SOGECLAIR is listed on Euronext Growth Paris – Euronext® Family Business Index – ISIN code: FR0000065864 (Reuters SCLR.PA – Bloomberg SOG.FP)
